

ArvandTech Accelerator

IT, health and food security.

www.arvandt.com

About us

ArvandTech is a leading accelerator with innovative sight in the field of IT (information technology), health, and food security. The application process for seed accelerators is open to anyone but highly competitive. Accelerator's prepper infrastructures for small business-like funding, workspace, mentorship, etc., to develop startups and employment of young people and new graduates. The process that startups go through in the accelerator can be separated into five distinct phases: awareness, application, program, demo day, and post demo day. ArvandTech has signed bilateral agreements with 5 universities in Khuzestan province.

1 The Shahid Chamran university of Ahwaz, 2 Khorramshahr University of Marine Science and Technology, 3 Ahwaz Jondishapur University of Medical Sciences 4 Petroleum University of Technology 5 Agricultural Sciences and Natural Resources University of Khuzestan.

Arvand operators transferred a branch of their activity after 5 years of successful work in Tehran (Azadi innovative factory) and start funding in many fields such as software, IoT, agriculture, health tourism, etc. So far, 7 startups have been funded by this center, and ArvandTech will receive a part of their shares in return for their investment in these startups so that the teams will not face financing and any other problems at the beginning of their journey.

This accelerator covers the pre-acceleration, acceleration, and round A investment period. After each period of investment, ArvandTech holds demo days to find investors for the next rounds of investing in each startup. All of these businesses operate based on new knowledge and technology to grow by creating added value in the economy.
